Clinic Ace software was designed to go beyond just client and patient management, with scheduling, HR, compensation reporting, invoicing and a full accounting stack built directly into it. Providing complete transparency and operational efficiency, Clinic Ace empowers businesses to be client and patient focused, creating a collaborative environment with all the tracking your business needs in one safe and secure location.

From digital session notes and intake processes, to client and patient management, our software ensures that with one quick search your business always has the answers it needs to be successful. Clinic Ace is the next evolutionary step in clinic efficiency as it's customizable to match your specific needs, providing a complete clinic and practice management solution.

CLINICIANS & PRACTICIONERS NEED IT

Providing instant onsite and remote access to all essential information, Clinic Ace is there for you when you need it, ensuring the right details are always managed, logged and stored as needed.

With configurable clinician settings and remote access to essential information, scheduling, charting, session notes and compensation reporting, Clinic Ace redefines the relationship between businesses and clinicians. We provide real-time treatment communication, goal-oriented success tracking, on the spot invoicing and real-time compensation reporting. Our goal is unity, bringing teams together with one simple, informative product that maximizes results to make working together easier than ever.
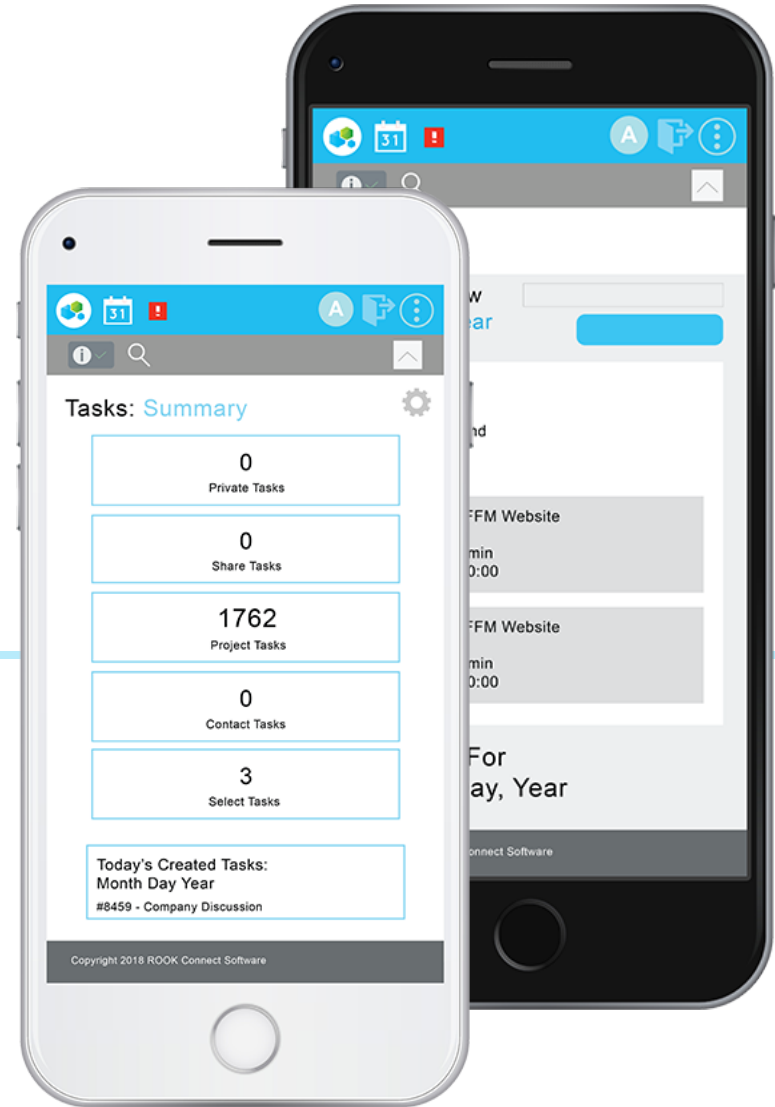

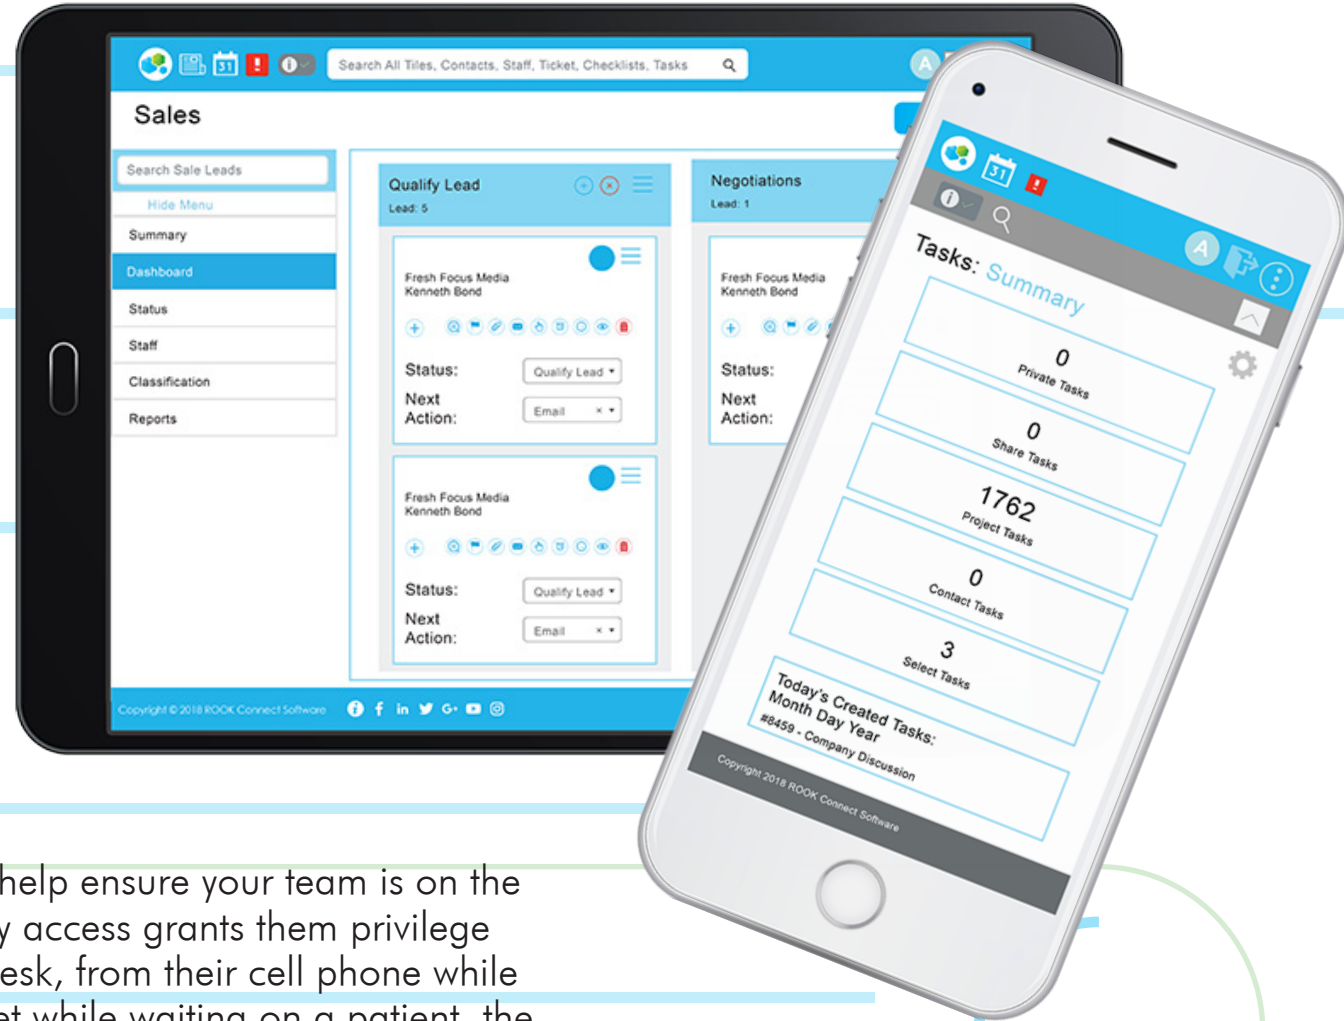

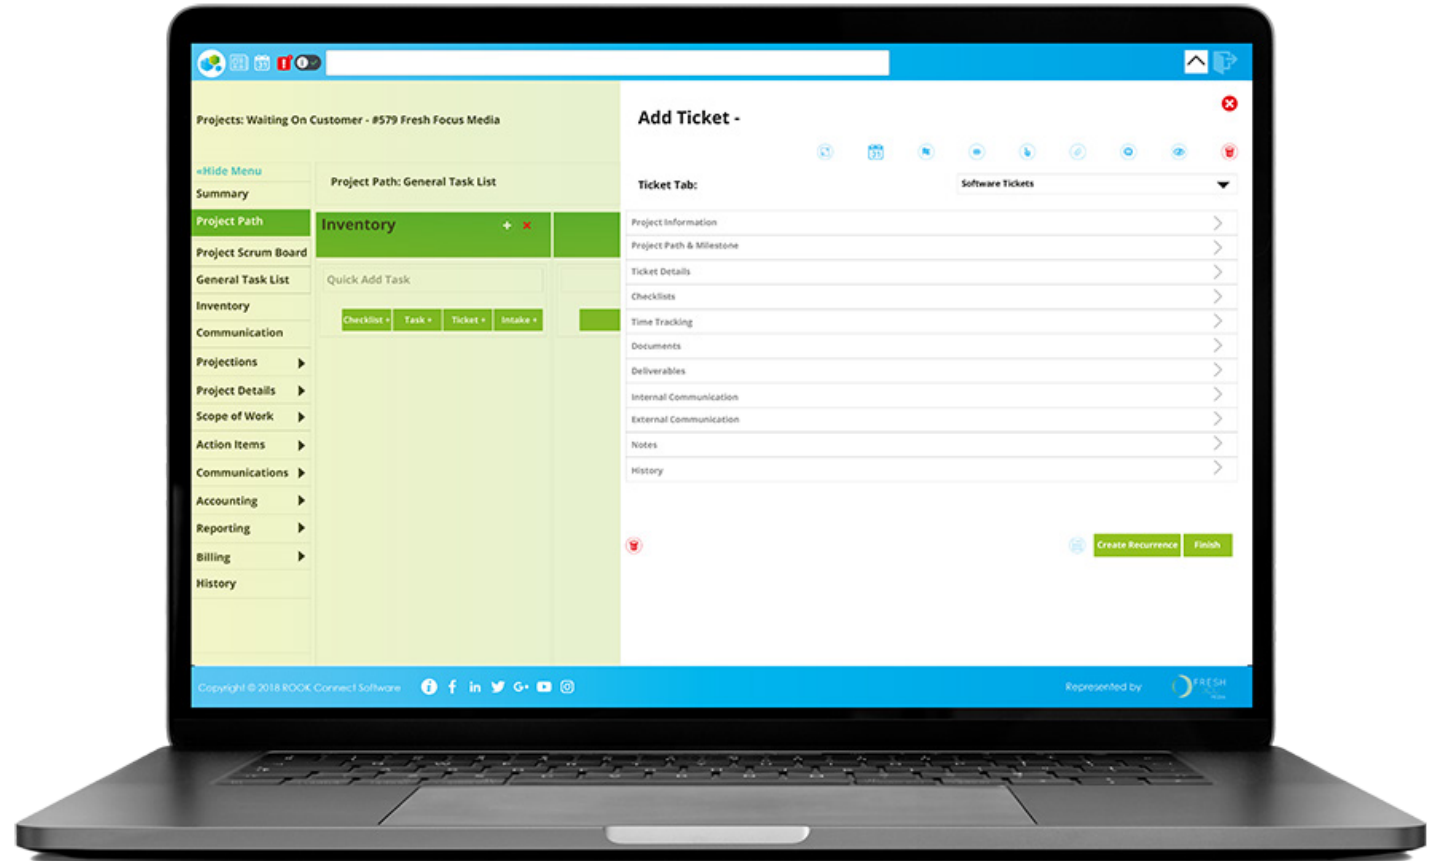

SEAMLESS SYNC
ACROSS ALL DEVICES

Unlike traditional software, Clinic Ace is always working to help ensure your team is on the same page with all aspects of the business that their security access grants them privilege to see. Whether staff book an appointment from the front desk, from their cell phone while taking a call or a contractor books an event from their tablet while waiting on a patient, the information will be updated on all devices immediately.

ADITIONAL FEATURES
UNIQUE TO
CLINIC ACE

The unique tile based design of Clinic Ace maintains security for staff, contractors and patients with ease. Our software gives our clients the ability to turn on and off functionality for staff based on their needs, ensuring that each individual accessing the software only sees what they need to see to do their job.

While this is a great security feature, it's also an efficiency application as individuals accessing the software never feel overwhelmed or have to go looking for information. Everything they need will be in the tile that represents their position, accessible in the order in which they need to do their job.

CLIENT & PATIENT
RELATIONSHIP MANAGEMENT

Using applications such as digital charting, dictation to text, treatment recording and in-session videography and photography applications, Clinic Ace is focused on enhancing the client and patient experience.

Clinic Ace empowers clinics and practices to automate documentation, enhance communication, increase client and patient care, and bridge the gap between physician and client expectations and available resources. Through our complete management approach, your caseloads, client files and document structure will never be in question. Know that your information is 100% secure and always available to you when and as needed.

CLINIC ACE SOFTWARE IMPLEMENTATION PROCESS

REQUIREMENT ANALYSIS

A detailed review of all functionality and software/ERP requirements to ensure both parties are the right fit for one another. Through this analysis and detailed scope review, our team will present existing software/ERP processes as we complete an information gathering meeting.

PROCESS MAPPING

Capitalizing on proven systems built into the software/ERP, our team will visually map out the exact process your business is currently using and/or the new digital process to be applied. This ensures transparency on exactly what you can expect from the software.

PLANNING & ARCHITECTURE

Accounting for all details and foreseeable business impacts, our team will assign a Project Lead and Co-Lead to your account who will build out a strategic plan with you for executing both a demo and live version of your software/ERP platform for testing and live use.

CONFIGURATION & PROTOTYPING

Through transparent, ongoing communication, our team will coordinate the loading of your data into the software/ERP, the configuration of the settings to match your needs and will walk you through how to best use the software for your business.

DESIGN & DEVELOPMENT

Executing on your business process map, our team will communicate detailed time estimates and provide clear deliverables to ensure we're aligned regarding expectations.

TESTING & QUALITY ASSURANCE

With developer, internal and external quality assurance checks as part of our process, our goal is not only to provide you with detail oriented results; but to include you in the process. We review and work alongside your business through each feature to ensure the best results.

TRAINING & IMPLEMENTATION

All businesses and staff/teams learn at different speeds, and there's not one perfect method for training and implementing software/ERP into any business. With a variety of virtual, classroom and onsite training options available, our goal is to help your business get the most out of our software by accommodating your training preferences.

UX REVIEW

Being an ever evolving, adaptable and growing software/ERP system means ensuring that our customer's ongoing wants and needs from the system are constantly being reviewed. Listening and learning from how customer wants, needs and use case applications differ provides us with the direction to constantly advance our offerings.

SUPPORT

With a variety of flexible support plans designed so your business gets the right support when and as needed, our goal is to support our products and ensure you're getting the most out of them. As a product that can manage one aspect of your business or your entire business, we're here to support you as needed, when needed.

Contact Clinic Ace for a meeting to discuss how we can enhance your business

KENNETH BOND
Founder & CEO

As a Marketing, Software and Digital Media Technology Strategist, I am passionate about the development and integration of technology into day to day business. As the CEO and Founder of Fresh Focus Media, my goal is to bridge the gap between functional day to day operations and increase how technology can be applied to streamline business. Working with businesses to increase their overall efficiency and challenge innovation through the application of visualization tools and data analytics, I am looking to re-engineer and re-shape the way businesses positively create impact utilizing digital media.

Challenge
Clinic Ace

Clinic Ace is dedicated to delivering the most interactive, easy to use software platform available. It was built due to the gaps in today's market with other software platforms, and is focused on continuing to evolve, grow and drive results for our customers.

Clinic Ace has evolved through referrals. Impressing our customers and having them drive our success by getting their customers on board with our software has led to continued and ongoing growth. Growing our community means exceeding expectations and adapting.

With a multitude of configuration options, settings and customizable features, Clinic Ace can be tailored to match as many or as few of your business needs as desired. We welcome all functionality and additional feature requests.

ClinicAce

Clinic Ace was developed in collaboration with clinicians who struggled with the current solutions available. While many solutions offered the robust ability to be accessible anywhere, the challenge was that the software still worked the same as older solutions, challenging to use with applications that still didn't do everything that was needed.

The goal of Clinic Ace is to ensure that the strategic patient path that our clients designated was followed, and that functionality was clearly broken out so the software could literally guide staff, training them on proper procedures and delivering real results.
